

EuroMouse Conference

UNDERSTANDING HUMAN DISEASE THROUGH MOUSE GENETICS: THE EUROPEAN DIMENSION

VENICE

14TH – 15TH OCTOBER 2005

EuroMouse is the 1st joint meeting of European research projects investigating the functional genomics of the mouse.

Aims of the Conference

To demonstrate the added value of supporting mouse functional genomics research at a European Level and debate priorities for the future direction of mouse functional genomics research in Europe.

To increase the competitiveness of European research and establish synergies with research programmes within and outside Europe.

Day 1 - EuroMouse Meeting

- Presentations from the 15 EuroMouse projects
- Open discussion of priorities for mouse functional genomics research

Day 2 - PRIME Open Meeting: Priorities for Mouse Functional Genomics research in Europe

- Development of standardised protocols for phenotyping mice
- Bioinformatics - ontologies and databases
- Systematic production of mutant mice
- Archiving mouse lines
- Laboratory Animal Science and Welfare
- Further open discussion on priorities for mouse functional genomics research
